# Flush Silhouette

## Ø22mm CW Series Control Units

Third-generation Safety Construction

Ø22 CW series

IDEC CORPORATION

# Safety in Style and Sophistication

Safety

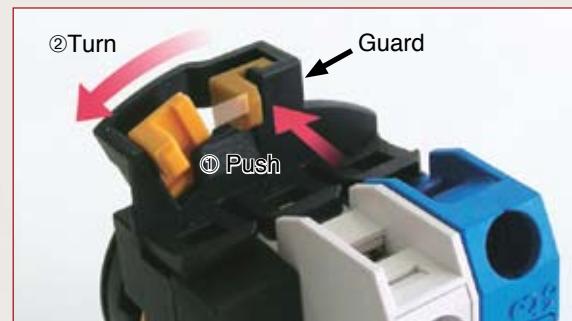

## Two-action removal of contact blocks

IDEK's original two-action push-turn locking lever provides a higher level of safety by preventing unexpected release of the locking lever. Whether the contact block is installed securely can be checked easily from the back of the panel, with the position of the locking lever.

## Locking lever integrated with guard

Prevents locking lever from unexpected release or damage by trapped wires.

## Third-generation Safety Construction

## IP20 Finger-safe Terminal

Finger-safe, IP20 terminal prevents electrical shock.

▶ See page 7

▶ See page 7

**IDEC's** commitment to assuring safety in all operating environments has resulted in stylish, compact, and space-saving control units. The innovative two-step locking lever integrated with a guard provides a higher level of safety, and low projection from the panel surface reduces the possibility of unexpected activation or damage of the operator. The CW series control units add a sleek and stylish image to the panel with black or metallic bezels. The shortest depth behind the panel in its class\* contributes to reducing the size of your machines and control panels.

\* As of October 2009

## Design & Style

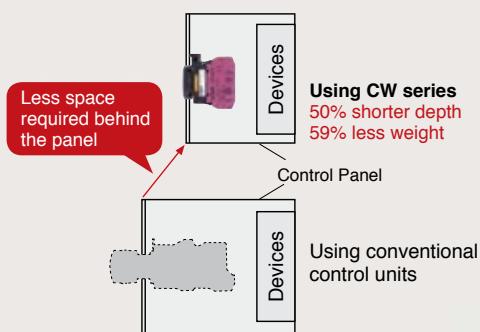

### Sleek and stylish control units with a 2.5mm-thick bezel

The CW series control units give a sleek, stylish image to your machines or control panels. The surface is safer with less chance of unexpected operation or accidents by hitting the projections, and also is cleaner with less dust build-up.

## Ecology & Usability

### Depth behind the panel comparison

The depth behind the panel of the CW series is shorter than the conventional control units, reducing the required space in the control panel (compared with IDEC Ø22mm HW series illuminated pushbutton with 2 contact blocks and a transformer).

### Only 39.9mm depth behind the panel Space-saving design

Short depth behind the panel allows size reduction of machines and panels. Up to 3 contact blocks (non-illuminated type) and 2 contact blocks (illuminated type) can be installed. Can be used with IDEC FB series or other control boxes.

- ✓ 120V AC, 10A contact rating
- ✓ No transformer needed—the same depth behind the panel—for any illumination voltage.

## Ø22mm CW Series Line Up

### Wide Variety

**Selector Switch**  
(Knob Operator)

# Ø22 Flush Silhouette CW Series Control Units

**Flush bezel projects only 2.5mm from front of panel  
Only 39.9mm depth behind the panel.**

- ø22.3mm mounting hole compliant with IEC 60947-5-1
- 3.5-mm operator travel for pushbuttons ensures comfortable and reliable operation.
- Black and metallic bezels available.
- Illuminated pushbuttons, pushbuttons, pilot lights, selector switches, and key selector switches are available.
- Direct opening NC contact ensures shutdown without failure.
- Seven different keys can be chosen for key selector switches.
- 10A contact rating. Up to three contact blocks for non-illuminated and two contact blocks for illuminated type can be connected.
- Contact blocks can be removed by the two-action locking lever integrated with a guard, ensuring safety.
- IP20 finger-safe screw terminals
- IP65 degree of protection (IEC 60529) from panel front.
- CCC approval pending.

Applicable Standards	Mark	File No. or Organization
UL508 CSA C22.2 No.14		UL/c-UL File No. E68961
EN60947-5-1		TÜV SÜD EC Low Voltage Directive

## Contact Ratings

Rated Insulation Voltage (Ui)		300V				
Rated Thermal Current (Ith)		10A				
Rated Operating Voltage (Ue)		24V	120V	240V		
Rated Operating Current (Ie)	Electrical Life 50,000 operations	AC 50/60 Hz	Resistive Load (AC-12)	10A	10A	6A
			Inductive Load (AC-15)	10A	6A	3A
		DC	Resistive Load (DC-12)	8A	2.2A	1.1A
			Inductive Load (DC-13)	4A	1.1A	0.55A
			Resistive Load (AC-12)	5A	5A	3A
	Electrical Life 100,000 operations	AC 50/60 Hz	Inductive Load (AC-15)	5A	3A	1.5A
			Resistive Load (DC-12)	4A	1.1A	0.55A
			Inductive Load (DC-13)	2A	0.55A	0.27A
Contact Material		Silver				

- Minimum applicable load (reference value): 3V AC/DC, 5 mA  
(Applicable range is subject to the operating conditions and load.)
- Note: The operational current represents the classification by making and breaking currents (IEC 60947-5-1).
- UL, c-UL rating: A300

## Weight (Examples)

Illuminated Pushbutton	46g (CW1L-M1E02QH, 2 contact blocks)
Pushbutton	45g (CW1B-M1E03, 3 contact blocks)
Pilot Light	27g (CW1P-1EQH)
Selector Switch	48g (CW1S-2E03, 3 contact blocks)
Key Selector Switch	61g (CW1K-2E03, 3 contact blocks)

## Specifications

Operating Temperature	Non-illuminated: -25 to +60°C (no freezing) LED illuminated: -25 to +55°C (no freezing)
Operating Humidity	45 to 85% RH (no condensation)
Storage Temperature	-40 to 80°C
Contact Resistance	50 mΩ maximum (initial value)
Insulation Resistance	100 MΩ minimum (500V DC megger)
Oversupply Category	II (IEC 60664-1)
Impulse Withstand Voltage	2.5 kV (IEC60664-1/60947-5-1)
Pollution Degree	3 (IEC60947-5-1)
Vibration Resistance	Operating extremes: 5 to 55Hz, amplitude 0.5 mm
Shock Resistance	Operating extremes: 100 m/s <sup>2</sup> Damage limits: 1000 m/s <sup>2</sup>
Mechanical Life (minimum operations)	Pushbutton, illuminated pushbutton: 2,000,000 Selector switch: 250,000 Key selector switch: 250,000
Electrical Life (minimum operations)	50,000 (see Contact Ratings) 100,000 (see Contact Ratings) (switching frequency 1800 operations/h)
Degree of Protection (IEC60529)	Panel front: IP65 Terminal: IP20
Short-circuit Protection	250V/10A fuse (Type aM IEC60269-1, IEC602069-2)
Electrical Shock Protection	Class II (IEC61140)
Terminal Style	Screw terminal (M3.5 slotted Phillips screw)
Bezel Material	Polyamide
Applicable Wire Size	Up to 2 wires of 2 mm <sup>2</sup> (solid wire ø1.6) maximum (AWG14 to 16) (Ring terminal cannot be used.)
Recommended Tightening Torque	Terminal: 1.0 to 1.3 N·m Locking ring: 1.2 N·m

## Direct Opening of Key Selector Switch

Applicable Type	2-position (3NC)	3-position (2NC)
Minimum Operator Angle for Direct Opening Action	90°	45°
Minimum Operator Torque for Direct Opening Action	0.2 N·m	0.3 N·m
Maximum Operator Angle	90°	45°

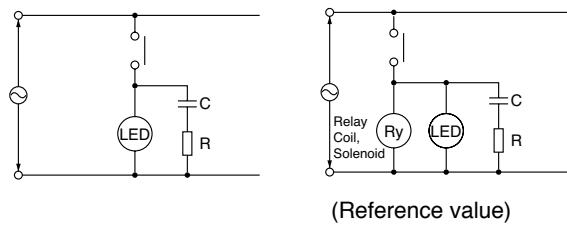

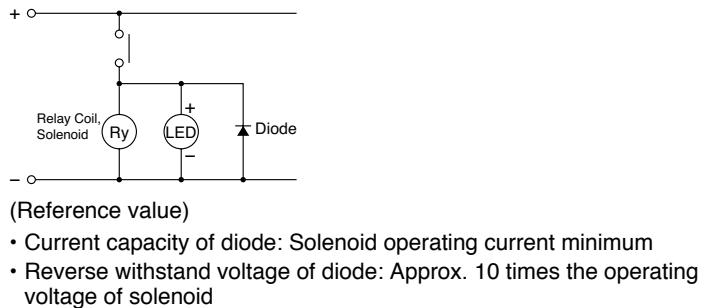

**LED Module**

Rated Insulation Voltage (Ui)	250V				
Rated Operating Voltage (Ue)	6V AC/DC	12V AC/DC	24V AC/DC	100/120V AC	200/220V AC
Operating Voltage Range	6V AC/DC±10%	12V AC/DC±10%	24V AC/DC±10%	100/120V AC±10%	200/220V AC±10%
Illumination Color Code ②	A (amber), G (green), PW (pure white), R (red), S (blue)				
LED Module Type No.	CW-EAQ2②	CW-EAQ3②	CW-EAQ4②	CW-EAQH②	CW-EAQM②
Current Draw	15 mA	15 mA	16.5 mA	18 mA	20 mA
Life (reference value)	Approx. 30,000 hours (The illuminance is reduced to 50% the initial intensity when used on complete DC at 25°C.)				
Internal Circuit					

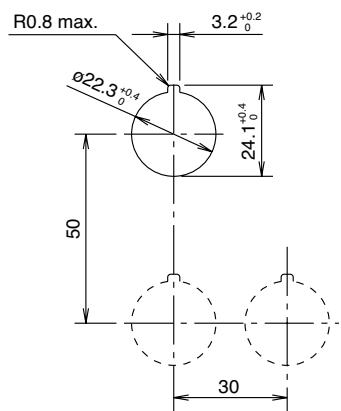

- Specify an illumination color code in place of ② in the type No.
- Use the pure white (PW) LED module for yellow illumination.
- See page 14 for replacement LED module.

**Notes for Using Illuminated Pushbuttons and Pilot Lights**

When using LED illuminated control units, provide protection against electrical noise as shown below, otherwise the LED elements will deteriorate, resulting in reduced brightness, hue change, or no lighting. Use an RC circuit or surge absorber for suppressing noise.

**Example 1: AC Circuit****Example 2: DC Circuit****Mounting Hole Layout**

- IEC 60947-5-1 compliant

Note: Determine mounting centers to ensure easy operation.

- Specify a bezel color code in place of □ in the Type No.: 1 (black bezel), 4 (metallic bezel)
- On the spring-retumed types, the key can be released only from the maintained position. On the maintained types, the key can be released from every position. Key retained positions are also available. See below.
- Two keys are supplied.
- Key cylinder material: Metal
- Besides the standard key (key number 0H), six other keys are also available. See below.
- For the contact block mounting position, see page 11.
- For dimensions, see page 13.
- When ordering an optional key or optional key retained positions, specify designation codes as shown below:

[Example] CW1K-2AE10-1H

### Accessories

Shape	Material	Ordering Type No.	Package Quantity	Remarks
Locking Ring Wrench	Brass	MW9Z-T1	1	<ul style="list-style-type: none"> <li>Used to tighten the locking ring when installing the CW series control unit in a panel cut-out.</li> <li>Weight: Approx 150g</li> </ul> 
Mounting Hole Plug	Polyamide (black)	LW9Z-BP1	1	<ul style="list-style-type: none"> <li>Used to plug an unnecessary ø22.3mm hole in the panel.</li> <li>Degree of protection: IP65</li> <li>Panel thickness: 0.8 to 6.0 mm</li> </ul>

### Maintenance Parts

Used for replacement only. Do not use the maintenance parts to remodel or expand the CW series control units.

Shape	Material	Type No.	Ordering Type No.	Package Quantity	Remarks
Lens 	1 Round Flush	Polyalylate	CW9Z-L11②	CW9Z-L11②PN05	5
	2 Round Extended	Polyalylate	CW9Z-L12②	CW9Z-L12②PN05	5
	3 Round Extended	Polyalylate	CW9Z-L15②	CW9Z-L15②PN05	5
Contact Block 	1NO	CW-E10	CW-E10PN02	2	Housing color: Blue Terminal No.: 3-4
	1NC	CW-E01	CW-E01PN02	2	Housing color: Reddish purple Terminal No.: 1-2
Dummy Block 	Polyamide (black)	CW-DB	CW-DBPN05	5	
Locking Ring 	Polyamide (black)	CW9Z-LN	CW9Z-LNPN05	5	
Gasket 	Nitrile rubber	CW9Z-WM	CW9Z-WMPN10	10	Waterproof gasket between CW control unit bezel and the mounting panel.
Spare Key 	Zinc (nickel-plated)	LA9Z-SK-□	LA9Z-SK-□PN02	2	Specify a key No. in place of □. 0H: Standard key (reversible) 1H to 2H: Reversible key 3H to 6H: Non-reversible key For dimensions, see page 13.

### LED Module

Package quantity: 1

Shape	Operating Voltage Range	Current Draw	Ordering Type No.	Illumination Color Code ②
	6V AC/DC±10%	15 mA	CW-EAQ2②	Specify an illumination color code in place of ② in the Ordering Type No. A: amber G: green PW: pure white R: red S: blue
	12V AC/DC±10%	15 mA	CW-EAQ3②	
	24V AC/DC±10%	16.5 mA	CW-EAQ4②	
	100/120V AC±10%	18 mA	CW-EAQH②	
	200/220V AC±10%	20 mA	CW-EAQM②	
	230/240V AC±10%	18 mA	CW-EAQM4②	

• Use a pure white (PW) LED module for yellow (Y) illumination.

## Safety Precautions

- Turn off the power to the CW series control units before installation, removal, wiring, and maintenance. Failure to turn power off may cause electrical shocks or fire hazard.
- For wiring, use wires of a proper size to meet the voltage and current requirements. Tighten the M3.5 terminal screws to a tightening torque of 1.0 to 1.3 N·m. Failure to tighten the terminal screws may cause overheating and fire.

## Operating Instructions

### Notes for Operation

- When using the CW series control units in a safety-related circuit of a control system, observe safety rules and regulations of each country concerning particular applications of the actual machines and facilities. Perform risk assessment before operation to ensure safety.

### Operating Conditions

- In corrosive gas or high-temperature, high-humidity atmosphere, contact failure due to corrosion or color change or breakage of the housing may occur.
- Main parts of the CW series control units are made of plastics. Do not scratch the surface with a sharp object or apply excessive shocks or load, otherwise the control units may be damaged. In particular, keep the button, lens, and bezel from such damage, otherwise appearance and function may be impaired.
- Do not apply detergents, cutting oils, or chemicals which may impair the function and appearance of the CW series control units.

### Panel Mounting

Remove the contact block from the operator. Remove the locking ring from the operator. Insert the operator into the panel cut-out from the front, tighten the locking ring from the back, then install the contact block to the operator.

#### Mounting Hole

- Mounting hole dimensions are in compliance with IEC60947-5-1.
- If the anti-rotation projection is removed from the bezel, CW series control units can be mounted in Ø22.3mm mounting holes. To remove the anti-rotation projection, remove the gasket and use cutting pliers to break the projection.

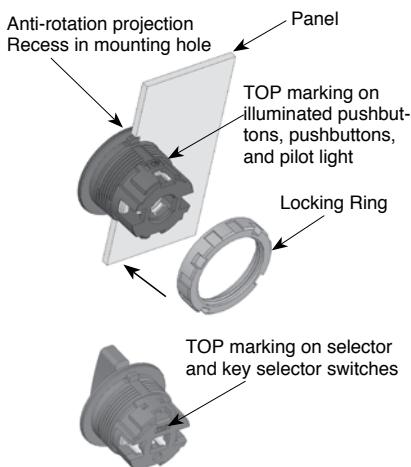

#### Removing and Installing the Contact Unit

- To remove the contact block from the operator, push the yellow locking lever and turn it to the left.
- To install, align the TOP marking on the operator with the TOP marking on the contact block mounting adaptor, and turn the locking lever to the right.

#### Installation in Panel Cut-out

Remove the locking ring from the operator. With the anti-rotation projection on the operator aligned with the recess in the mounting hole, insert the operator into the mounting hole. Tighten the locking ring from the rear of the panel.

#### Note for Panel Mounting

When installing the operator in a panel cut-out, use the optional locking ring wrench (MW9Z-T1) to tighten the locking ring to a recommended tightening torque of 1.2 N·m. Do not use pliers and do not tighten excessively, otherwise the operator may be damaged.

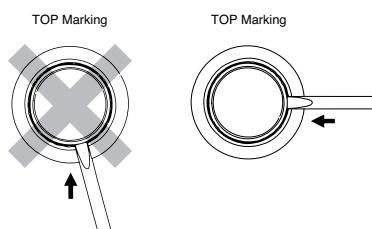

### Illuminated Pushbuttons and Pilot Lights

#### Removing the Lens

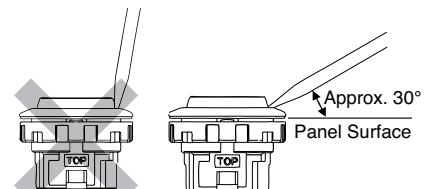

To remove the lens from an illuminated pushbutton or pilot light, insert a flat screwdriver under the flange of the lens at 90° from the TOP marking and twist the screwdriver.

Do not insert the screwdriver too deeply and do not apply excessive force to the lens, otherwise the bezel surface may be damaged.

#### [Screwdriver Insertion Direction]

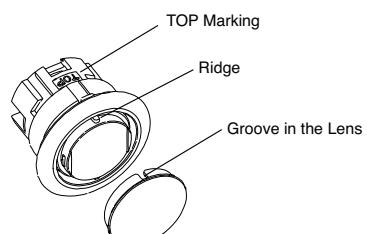

#### [Screwdriver Insertion Angle]

#### Installing the Lens

Turn the groove in the lens to the TOP marking on the operator housing. With the groove aligned with the ridge, press the lens in.

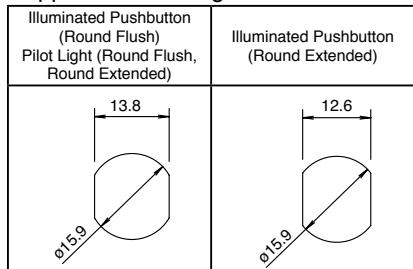

# Ø22 Flush Silhouette CW Series Control Units

## Operating Instructions

### • Marking

Marking plates are not available for CW series illuminated pushbuttons and pilot lights. Marking film can be inserted to indicate legends.

### • Applicable Marking Film Size

Thickness: 0.2 mm maximum

Film material: Polyester (recommended)

Note: Film is not supplied and must be prepared by the user.

### Pushbuttons

Pushbutton caps cannot be removed. Do not tamper with the pushbutton caps using a screwdriver or pliers, otherwise the pushbutton caps may be damaged.

### Selector Switches

Turn the selector operator or key to the detent positions.

### Key Selector Switches

To prevent malfunctions and damage, take the following precautions.

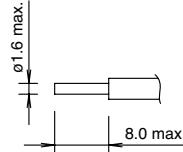

- Insert the key to the bottom before turning.
- Do not remove the key while turning.
- Besides the standard key (0H), six other keys are available. Use a key with a key selector switch of a matching number indicated on the key cylinder. Standard key does not have a key number indication.
- Keys are available in two shapes. Key numbers 0H (standard), 1H, and 2H are reversible keys. Key numbers 3H, 4H, 5H, and 6H are non-reversible keys. Make sure of correct insertion direction.

### Wiring

#### • Applicable Wires

Stranded wire: 2.0 mm<sup>2</sup> maximum

Solid wire: Ø1.6 mm maximum

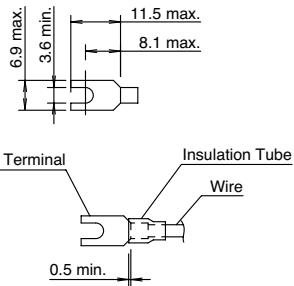

One or two wires can be connected to the terminal.

#### • Applicable Crimping Terminals

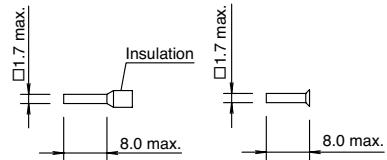

##### [Spade terminal]

When using crimping terminals, be sure to use insulating tubes or use insulated crimping terminals.

##### [Ferrule]

When connecting two ferrules to one terminal, use ferrules without insulation.

When using spade terminals or ferrules, insert them to the bottom. Ring terminals cannot be used.

#### • Screw Tightening Torque

Tighten the M3.5 terminal screws to a recommended torque of 1.0 to 1.3 N·m.

Specifications and other descriptions in this catalog are subject to change without notice.
